FLOWER SEED NOVELTIES FOR 1895

OFFERED BY

WILLIAM BULL, F.L.S.,
NEW PLANT AND SEED MERCHANT,
536, King's Road, CHELSEA, LONDON, S.W.

N.B.—In ordering Flower Seeds from this Catalogue, it will be sufficient to quote the marginal number affixed to each article.

1. CHRYSANTHEMUM JAPONICUM IMPERIALE.

LARGE-FLOWERING IMPERIAL JAPANESE CHRYSANTHEMUM.

The Seed now offered has been imported from the largest Chrysanthemum grower in Japan, the collection of varieties from which it has been saved being the largest and most select extant, containing very many kinds of a surpassing beauty and excellence not known in this country. The blooms are of gigantic size, of smooth, downy or twisted petals, and are of almost all colours except blue. Some are almost black, others pure white; others again are of the tenderest pink and carnation, besides many charming shades in yellow, brown, bronze and other brilliant hues. Fine mixed Seed, 1*s.* 6*d.* per packet.

CLARKIA ELEGANS NANA ROSEA.

2. CLARKIA ELEGANS NANA ROSEA.

A new dwarf compact-growing variety of this free-flowering hardy annual. The bushy plants attain only a height of 10 to 12 inches, and produce their large charming rose-coloured flowers on short upright branches. It will be found very effective and pretty for groups in borders or beds.

Price, 1*s.* per packet.

3. CONVOLVULUS MAJOR FL. PL.

DOUBLE-FLOWERED MORNING GLORY.

A double-flowered form of the well-known and popular Convolvulus major or Morning Glory. Like the type, it is of rapid growth, and freely produces its double flowers, which somewhat resemble in form those of *Calystegia pubescens fl. pl.* They are white with a slight spot of red or of blue at the base of the larger petals. About 80 per cent. are reproduced true from Seed.

Price, 1*s.* 6*d.* per packet.

4. DATURA CORNUCOPIA.

A very interesting and beautiful novelty, which will succeed admirably in a greenhouse. The flowers are produced when the plants are only a few inches high, the blossoming period extending all through the Summer. The individual blooms are semi-erect and of immense size, attaining on well grown plants, nearly a foot in length. The inner surface of the funnel-shaped tubes is of a French white, while the outside is of a bright purple. To add to their great beauty the flowers are deliciously scented.

Price, 1*s.* 6*d.* per packet.

5. DIANTHUS LACINIATUS,

"SALMON QUEEN."

This pretty new variety produces in great profusion, handsomely fringed and laciniated flowers of the most brilliant salmon colour imaginable, changing into a lovely salmon rose. The plants attain a height of 10 to 12 inches, and will be found of the greatest use for planting in beds and borders, the flowers being very showy and most useful or cutting.

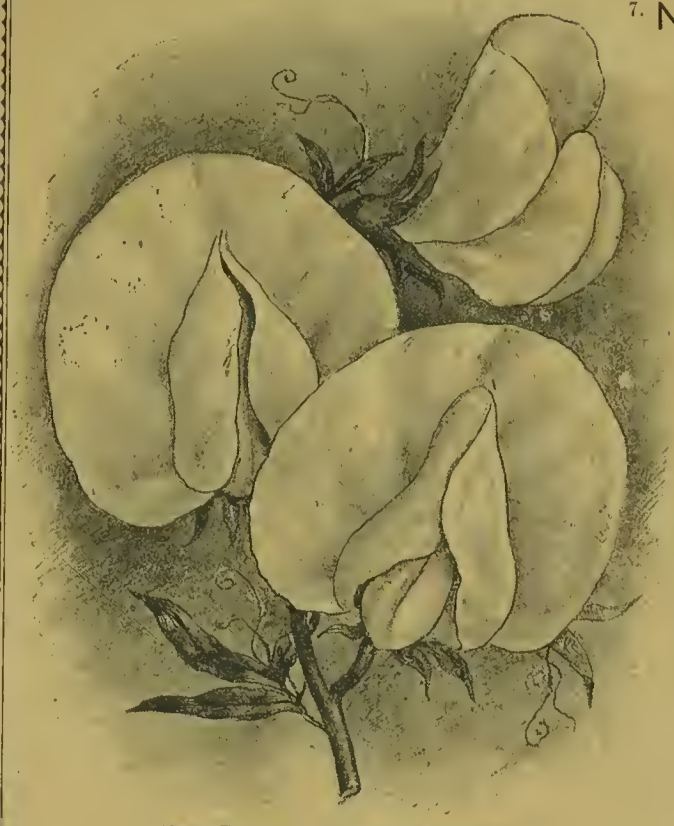
Price, 1*s.* 6*d.* per packet.

MIGNONETTE, GOLDEN GEM.

6. MIGNONETTE, GOLDEN GEM.

A beautiful dwarf-growing Mignonette, of compact and regular pyramidal growth, producing an abundance of spikes of a rich golden-yellow colour. It is of the greatest value either for growing in pots for general decoration, or sown in the open borders for cutting purposes. *Vide* illustration.

Price, 1*s.* per packet.



SWEET PEA, BLANCHE BURPEE.

7. NEW GIANT WHITE SWEET PEA, BLANCHE BURPEE.

A new pure white variety of exquisite form and immense size, having a bold upright shell-shaped standard of great substance, absolutely free from the central notch, so conspicuous in other white varieties; the wings are also pure white, and it is said to be by far the finest pure white Sweet Pea as yet introduced. It is of exceptionally robust habit, bearing usually three flowers on a stalk. Has been awarded two First Class Certificates.

In raiser's sealed packets, 1*s.* each.

8. ## PETUNIA, "GIANTS OF CALIFORNIA."

A new and spleudid strain of Petunias, raised by a celebrated Californian grower. The flowers are of immense size, measuring sometimes 5 inches in diameter, and comprise almost every shade of colour, the veining and markings being most exquisite. The blossoms are of great substance and beautifully fringed.

Price, 1*s.* per packet.

9. ## PRIMULA OBCONICA GRANDIFLORA.

A large-flowered form of the pretty decorative *Primula obconica*, producing almost continuously large trusses of bloom, the individual flowers measuring from 1 to 1¼ inch in diameter; they are also much deeper in colour than the normal small-flowered type, to which it is infinitely superior.

Price, 2*s.* 6*d.* per packet.

10. ## TECOMA SMITHII.

One of the finest Seed Novelties yet introduced, and an exceedingly beautiful addition to our Autumn and Winter flowering greenhouse plants. The flowers are tubular in shape, about 2 inches long, and about 1 inch in diameter at the mouth, of a rich lemon colour shaded with dark orange, borne in large terminal corymbiform heads, presenting a most charming appearance, and lasting in full beauty for upwards of a month.

The plant is very easily grown, in fact, is as easily managed as a Chrysanthemum. Was awarded a First Class Certificate by the Royal Horticultural Society.

Price, 2*s.* 6*d.* per packet.

SPECIALITIES FOR 1895.

11. LOBELIA, BARNARD'S PERPETUAL.

This splendid acquisition sent out by Mr. William Bull, is without doubt the finest Lobelia yet raised. The flowers are of the most brilliant ultramarine blue, strikingly ornamented with a pure white marking at the base of each of the two lower petals. It is of compact habit, and alike useful for bedding or growing in pots, while the bright and effective colouring of its flowers, combined with its perpetual blooming character, renders it most desirable for beds and ribbon borders. It was awarded a Certificate of Merit by the Royal Horticultural Society when exhibited in May, 1892, at the Temple Show.

Price, 1*s.* 6*d.* per packet.

12. ASPARAGUS PLUMOSUS.

A very useful decorative plant for the greenhouse. Price, 2*s.* 6*d.* per packet.

MARGARET CARNATION.

13. ASPARAGUS PLUMOSUS NANUS.

An elegant and graceful ornamental greenhouse plant. Price, 2*s.* 6*d.* per packet.

14. NEW DOUBLE MARGARET CARNATIONS.

A beautiful novelty, growing about 12 inches high, and producing in the utmost profusion charming flowers of every variety of colour, including yellow. The plants are of vigorous growth, the numerous flower stalks being exceedingly strong and robust, and do not therefore require to be supported by sticks. For pot culture this variety cannot be excelled, and is, besides, most valuable for growing in beds and borders, and for cut-flower purposes generally.

Price, 6*d.* per packet.

CROZY'S CANNAS.

CANNAS.

CROZY'S GLADIOLUS-FLOWERED STRAIN.

The magnificent varieties of Cannas raised and sent out by M. Crozy, are too well-known and appreciated to need any lengthened description. They are of the greatest value for bedding purposes and flowering when quite dwarf, are admirably adapted for growing in pots for the decoration of greenhouses and conservatories, their showy spikes of flower remaining in full beauty for a length of time, exhibiting a wealth and variety of gorgeous colouring scarcely obtainable in any other class of plant. Some are brilliant yellow, others intense shades of scarlet, orange, salmon, crimson, red, maroon, &c., many being dotted, striped, maculated or rayed with yellow or scarlet, others again being crimson or scarlet, margined with a band of golden yellow; the flowers indeed are most diversified and pleasing in every way. Seed is now offered of many of the best sorts.

15. Mixed Seed, saved from Crozy's new varieties.

Price, 1*s.* 6*d.* per packet.

16. Collection of 12 finest varieties, 3*s.* 6*d.* per collection.

For dormant roots, *vide* page 75.

17. DWARF FRENCH MARIGOLD.

"PURPLE AND GOLD."

A charming new Dwarf French Marigold of regular growth, producing uninterruptedly from July until the frost sets in, a great profusion of pretty single flowers of a lovely golden yellow colour, each petal being ornamented with a velvety purple spot, imparting to the blooms a very attractive appearance. This pretty annual will be found of great use for cutting, being very florifereous and of easy culture, succeeding in any situation.

Price, 6*d.* per packet.

18. MYRSIPHYLLUM (SMILAX) ASPARAGOIDES.

A charming greenhouse climber with small dark-green cordate foliage, which is extremely useful for decorative purposes, as it remains fresh and green for several days after being cut.

Price, 6*d.* per packet.

STOCK, "PRINCESS MAY."

SUNFLOWER, "THOUSAND-FLOWERED."

19.

NEMESIA STRUMOSA SUTTONI.

The flowers of this pretty and distinct half-hardy plant range from ivory white to primrose, orange scarlet, crimson and purple, flowering in the open air all through the Summer.

Price, 1*s.* per packet.

20.

SAINTPAULIA IONANTHA.

A distinct and pretty greenhouse plant, producing an abundance of Violet-like flowers on slender stalks. The blossoms are of a violet blue colour, with golden yellow stamens.

Price, 1*s.* per packet.

21.

TEN-WEEK STOCK, "PRINCESS MAY."

A handsome variety, bearing large spikes of light primrose coloured flowers. The individual blossoms, when fully expanded, attain a diameter of two inches, the glossy green of the foliage showing off the delicate hue of the flowers to the best advantage. One of the earliest to flower. Price, 1*s.* 6*d.* per packet.

22.

STREPTOCARPUS.

New Hybrids.

These handsome hybrids are admirably adapted for greenhouse and conservatory decoration, their pretty trumpet-shaped flowers being produced in the utmost profusion through the Summer and early Autumn months. The value of these charming flowering plants is greatly enhanced by their great diversity of colour, which ranges from pure white to deep rose and violet-purple.

Price, 2*s.* 6*d.* per packet.

23.

SUNFLOWER,

"THOUSAND-FLOWERED."

When planted singly in good soil this new Sunflower is said, by the introducer, to grow to a height of from 12 to 15 feet, branching from the base to the top, each branch bearing a multitude of medium-sized golden-yellow flowers with small black centre, invaluable for cutting and other decorative purposes.

Price, 6*d.* per packet.

PRIMULAS.

Special Offer of Seed from Prize Strains.

24. **PRIMULA SINENSIS FIMBRIATA ALBA.**
25. **PRIMULA SINENSIS FIMBRIATA RUBRA.**
26. **PRIMULA SINENSIS FIMBRIATA, RED AND WHITE, MIXED.**

Mr. WILLIAM BULL has the greatest confidence in offering seed of the above, knowing that the produce cannot be excelled, it having been saved from the finest strains in cultivation, the flowers being remarkable for size, brightness of colour, and substance, while in general habit the plant leaves nothing to be desired. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULA SINENSIS FIMBRIATA.

27. **"PREMIER MIXTURE."**

Seed of Mr. WILLIAM BULL's select strain is now offered in mixture, containing all the new and most distinct colours and varieties; the many unsolicited testimonials received point conclusively to the fact of its being appreciated as of unusual excellence. To distinguish this from the ordinary mixture of *P. alba* and *rubra* generally supplied, Mr. W. B. designates this choice mixture as above. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

FERN-LEAVED PRIMULAS.

Sow Aster seed in April and May, in pans, or on a spent hot-bed in drills 6 inches asunder; when the plants are 1 inch high, prick out into a cold frame, or under hand-glasses, 3 or 4 inches apart, from whence they can be planted out when 4 inches high. Select showery weather for planting out, when the ground is in good working order; plant in rows 1 foot apart each way. To grow Asters to perfection, a rich soil is indispensable, and during dry weather they should be watered, and a top-dressing of well-rotted manure applied early in August.

STOCKS.

EAST LOTHIAN STOCK.

These Stocks are, without exception, the finest ever offered, the colours being crimson, scarlet, purple, and white, of remarkable brilliancy in the three former, and purity in the latter. The flowers are very double, produced on immense spikes. If grown in a rich soil they will keep up a succession of bloom from July until the end of November, after which the plants may be potted and kept to make a further display during the following summer.

* Hardy annuals most suitable for autumn sowing.

TIME OF SOWING.

HARDY ANNUALS may be sown in March and April, and for early spring blooming those marked with an asterisk should be sown early in September, in a sheltered situation, and when up, thinned so as to keep them strong. In March they may be transplanted where they are to bloom. Before sowing, which should be done on a fine dry day, carefully prepare the soil, and in covering, regulate the thickness by the size of the seeds—small seeds should be very lightly covered. Success in growing annuals depends in a great measure upon their being properly thinned to regular distances, so as to give plenty of room for the full development of each plant; this, in too many instances, is entirely neglected, hence the dissatisfaction so often expressed as to their use.

HALF-HARDY ANNUALS may be sown in March and April, in pans, placed on a slight hot-bed, and, when strong enough, pricked out into a cool frame near the glass, where they may get hardened and well established for transplanting into their blooming quarters early in May, or potted off singly for conservatory and greenhouse decorations. Under favourable circumstances many varieties will bloom freely if sown in the open ground about the middle of May.

TENDER ANNUALS such as Balsams, Celosias, Thunbergias, &c., require raising in a temperature ranging from 60° to 70°. Sow in pans or pots, and place near the glass; keep the soil moist, and shade from the sun until the plants appear. When strong enough, pot off into small pots, keeping them near the glass, and admitting air on every favourable occasion.

BIENNIALS AND PERENNIALS.—The more select and tender varieties for summer and autumn blooming may be sown in a gentle heat in March and April, and pricked out into pots until fully established, and then potted off singly, or transplanted into the open ground, as required. The hardier varieties may be sown in the open ground, in prepared beds, in June and July, and when strong enough transplanted into nursery beds, or where they are intended to bloom the following year.

CHOICE COLLECTIONS OF FLOWER SEEDS.

As in Flower Seeds new species or varieties and improved strains are being constantly imported, proved, or raised, and offered by Mr. William Bull, it naturally follows that giving mere names and descriptions convey in many instances but an inadequate idea of the desirability of some of the handsomest and best introductions. Collections of Flower Seeds are therefore made comprising the choicest strains of popular favourite flowers, and including selections of the best novelties.

Quality rather than quantity being especially considered—Mr. W. B.'s selections may safely be relied on in these Collections.

Mr. WILLIAM BULL'S

CHOICE COLLECTIONS OF VEGETABLE SEEDS

FOR ONE YEAR'S SUPPLY.

The following Collections of Vegetable Seeds have been arranged to meet the requirements of those who have not time or inclination to make their own selections. They are made up in the most liberal manner, care having been taken to give all the best and most useful varieties in each section, rather than a long list of comparatively useless kinds—

SELECT GENERAL LIST OF VEGETABLE SEEDS.

In the following General List of Vegetable Seeds, Mr. WILLIAM BULL has excluded all varieties of doubtful origin and quality, only the most distinct and useful varieties in each section being quoted. The Stocks of all seeds have been carefully selected from the most eminent cultivators at home and on the Continent, and their growth having been effectually tested, they are confidently offered as being the very best that can be procured.

ARTICHOKES.

Sow early in March, in rich soil, and when strong enough plant in rows 4 feet apart, and 30 inches from plant to plant.

THE EARLIEST TOMATO.

Can be Sown, Grown, & Ripened in the Open.

Tried by the Royal Horticultural Society at Chiswick, and received XXX for First-class Certificate as the earliest of 81 varieties from various climes and countries to ripen in the open.

This Tomato has been selected for its earliness, hardiness, and adaptability for outdoor growth, and as the best disease resister. It has large, handsome, smooth fruits of a brilliant vermilion-scarlet colour, which do not crack, and are freely produced on strong woody stems of medium height. The quality and flavour are both excellent. 4*d*. per packet.

BULL'S FOOD FOR PLANTS.

Contains in a concentrated form all the essential elements of plant life. It is of immense benefit applied as a top-dressing to plants and bulbs of all sorts grown in pots, especially when pot-bound, completely restoring exhausted energy, a few applications ensuring vigorous healthy growth, the flowers being produced in a most luxurious manner, combined with great richness of colouring. It can also be mixed with ordinary soil in potting, or may be used with most beneficial effect for Chrysanthemums, Shrubs, Vines, and all kinds of Fruits, whether in pots or planted in the open air.

FOR TESTIMONIALS see next page.

ANALYSTS' REPORT.

The analysis shows this to be a complete Plant Food, and of the highest quality. The material not only contains an abundance of all the constituents necessary for plant growth, but the analysis shows also that the four chief constituents are each in that combination which renders them in the most beneficial and available form for the healthy development of plants.

For these reasons, users of this Plant Food in the proper quantities cannot fail to produce the very best results within the capability of their plants.

CANNON & NEWTON,
Analytical and Consulting Chemists, 39, Mincing Lane, London, E.C.

DIRECTIONS FOR USE.

For POT PLANTS AND BULBS.—Sprinkle on the surface of the soil, about every three weeks, at the rate of a small teaspoonful to a 5-inch pot, so that when the plants are watered, the Plant Food will be gradually absorbed into the soil.

For CHRYSANTHEMUMS.—At the time of potting, some of the Plant Food should be thoroughly mixed with the compost, and afterwards, when the buds begin to swell, frequent top-dressings should be given, the quantity used being estimated according to the size of the pots and vigour of the plants.

For ROSES, SHRUBS, VINES, &c., in Pots.—Use about a tablespoonful to a 12-inch pot several times during the season.

For PLANTS, FRUITS, ROSES, and all Plants in Borders and the Open Ground.—Apply about 2 ozs. to the square yard as often as occasion may require, raking and watering it in.

For LAWNS.—Scatter broadcast at the rate of 2 ozs. to the square yard, and well water.

Sold in Tins, containing about 1½ lbs., price 1s. each. Larger Size, containing about 5 lbs., 2s. 6d. each.

Also in Bags, 14 lbs., 4s. 6d.; 28 lbs., 7s. 6d.; 56 lbs., 12s. 6d.; 112 lbs., 20s.

BULL'S FOOD FOR PLANTS.

TESTIMONIALS.

THE GARDENS, MOUNT MERRION, BOOTERSTOWN, DUBLIN, *4th December*, 1894.

Sir,—I am well pleased with your Plant Food. I grew my Chrysanthemums this year with it, and won four First Prizes, one £20 Cup, and one £10 Cup at the Dublin Show.

Yours truly, HUGH CRAWFORD, Gardener to the Rt. Hon. Earl of PEMBROKE.

CROFTON, AIGBURTH, LIVERPOOL, *20th February*, 1894.

Dear Sir,—After giving your Food for Plants a fair trial for over two years, I must say that I like it better than any Artificial Manure I have ever used. In 1892 I grew my Chrysanthemums with it, which won the 10-Guinea Cup at Grassendale and Aigburth Shows, also the First Prize at Liverpool. In 1893 I was again successful in carrying off like honours. I have used it on hard and soft wooded plants, and the results were everything that could be desired. It has no unpleasant odour, so that, unlike many Manures, is not offensive in the Conservatory.

Yours truly, DONALD FORBES.

HARKSTEAD RECTORY, near IPSWICH, *May 10th*, 1894.

Dear Sir,—Having used your Plant Food on Chrysanthemums with such good results, I have no hesitation in saying that it is the best Artificial Manure I have ever used, producing flowers of great size and depth, indeed, it is invaluable to those who have to exhibit blooms of the finest quality. One thing greatly in its favour is, that if applied in moderation, anyone may use it without running the risk of injuring the roots or the flowers damping, which is often the case with other Manures.

I am, Sir, yours respectfully, GEORGE JORDAN, Gardener to the Rev. HUGH BERNERS.

IMPNEY HALL, DROITWICH, *13th February*, 1893.

Dear Sir,—I am very pleased with the results from using your Plant Food. I grew my Chrysanthemums with it last season, which won the City of Edinburgh Silver Cup, also the three First Prizes for cut-blooms in the large Open Classes at Birmingham, and the First Prizes at Sheffield. I have also used it with excellent results for Strawberries, Melons, Pines, &c. I am now using it on Vine and Peach Borders with every confidence of its producing good results. I shall be glad if you will kindly forward another 5 cwt. and oblige,

Yours truly, RICHARD PARKER, Gardener to J. CORBETT, Esq.

CROSWOOD PARK, ABERYSTWITH, *17th March*, 1894.

Dear Sir,—I am delighted with your Food for Plants, I find it is excellent for Chrysanthemums, Pelargoniums, Fuchsias, Cinerarias, &c., in fact for all soft wooded plants. I also used it on my Vine borders and it enabled young Vines to carry remarkably heavy crops that ripened up well, while the flavour was everything that could be desired. A great advantage is that it has no unpleasant smell, so can be used in the Conservatory.

I am, yours faithfully, R. C. WILLIAMS, Gardener to Rt. Hon. Earl of LISBURNE.

OAKLANDS, AIGBURTH, LIVERPOOL, *12th March*, 1894.

Dear Sir,—I have much pleasure in stating that I have used your Food for Plants with great success on Vines, Peaches, Roses, &c., in fact I never had better results. For hard and soft wooded plants I can confidently recommend it as a safe and excellent Fertilizer. Yours truly, JOHN BOUNDS, Gardener to ALFRED L. JONES, Esq.

THE NURSERY, HAMMOND STREET, CHESHUNT, *July 18th*, 1894.

Dear Sir.—Will you send me 1 cwt. more of your Plant Food, and quote price for quarter ton, as I find my Tomatoes have greatly improved since using it on them, according to the directions. Yours truly, B. SEARING.

THE GARDENS, KEIR, DUNBLANE, BRIDGE OF ALLAN, N.B., *8th September*, 1893.

Dear Sir,—Your Plant Food is the best I have ever used. I have tried it on various plants with excellent effect and for stimulating and imparting colour to Crotons and other foliage plants, it is all that can be desired. I tried it on Cyclamens, and the results were marvellous. I took First Prize with these at Edinburgh last year. Kindly send me double the quantity, obliging

Yours truly, THOMAS LUNT, Gardener to ARCHIBALD STIRLING, Esq.

MANOR HOUSE, STRATTON AUDLEY, BICESTER, *9th November*, 1893.

Dear Sir,—I have used your Food for Plants for nearly two years, and like it better than any artificial Manure I have ever had. I have used it on my Vines and never had such a good crop. It is excellent for Chrysanthemums, Primulas, Ferns, &c. Please forward me another cwt., and oblige,

Yours faithfully, W. PARKER, Gardener to the Right Hon. Lady ROSE LEIGH.

ST. ANNE'S, CLONTARF, DUBLIN, *2nd March*, 1893.

Dear Sir,—I have used many Artificial Manures for plants in the past 36 years, but none that I like so well as your "Plant Food." Not only is it a quick Fertilizer, but it has no unpleasant odour—a great desideratum.

Yours faithfully, CHARLES SMITH, Gardener to the Right Hon. Lord ARDILAUN.

THE DEN, BELFAST, *27th January*, 1893.

Dear Sir,—You will doubtless be interested to know that last season I won twenty-three First and ten Second Prizes for plants and fruit grown with your Food for Plants, which has proved a most excellent stimulant, and is certainly the best Manure I have ever used. It is cleanly to use, creates no fungus, and has no unpleasant odour; in fact, no gardener should be without it. Please send me another cwt. and oblige,

Yours truly, WM. McILROY, Gardener to G. W. WOLFF, Esq.

LEIGHTON GARDENS, WELSHPOOL, *7th January*, 1892.

Now that I have used Mr. William Bull's Food for Plants over twelve months, I have very great pleasure in stating that I believe it to be the best Plant Manure in the market. It produces fine foliage, large flowers, and gives a good healthy appearance to Stove and Greenhouse Plants in general. I have also used it on Melons, Cucumbers, Tomatoes and Vines with good results, and it is excellent for Chrysanthemums.

WILLIAM ROTHWELL, Gardener to MRS. NAYLOR.

THE NURSERY, LOWTON, NEWTON-LE-WILLOWS, *15th December*, 1893.

Dear Sir,—Please send me 5 cwt. of your Plant Food at your earliest convenience. I must say it is the best Fertilizer I have tried on soft-wooded Plants, especially for Chrysanthemums and Pelargoniums.

Yours truly, JOSEPH LEIGH.

FORDE ABBEY, CHARD, *27th January*, 1894.

Dear Sir,—I think most highly of your Plant Food. It is splendid for all kinds of pot-stuff, and especially that which needs a strong Manure. It is grand for Chrysanthemums and all kinds of Winter-blooming plants.

Yours truly, JOHN CROOK, Gardener to W. H. EVANS, Esq.

For Full Particulars see preceding page.

GLADIOLUS.
(HYBRIDS OF GANDAVENSIS.)

There are few flowers more showy and beautiful than the Gladiolus, and the varieties of the *Gandavensis* section are perfectly hardy and easily grown, whilst their erect and stately growth, and long spikes of flowers, developing themselves successively, never fail to win admirers.

To facilitate the cultivation of this highly decorative plant, a few remarks may be necessary to some :—

The best and safest time for planting is from the beginning of April to the end of May, when a continuous bloom may be assured from July to September.

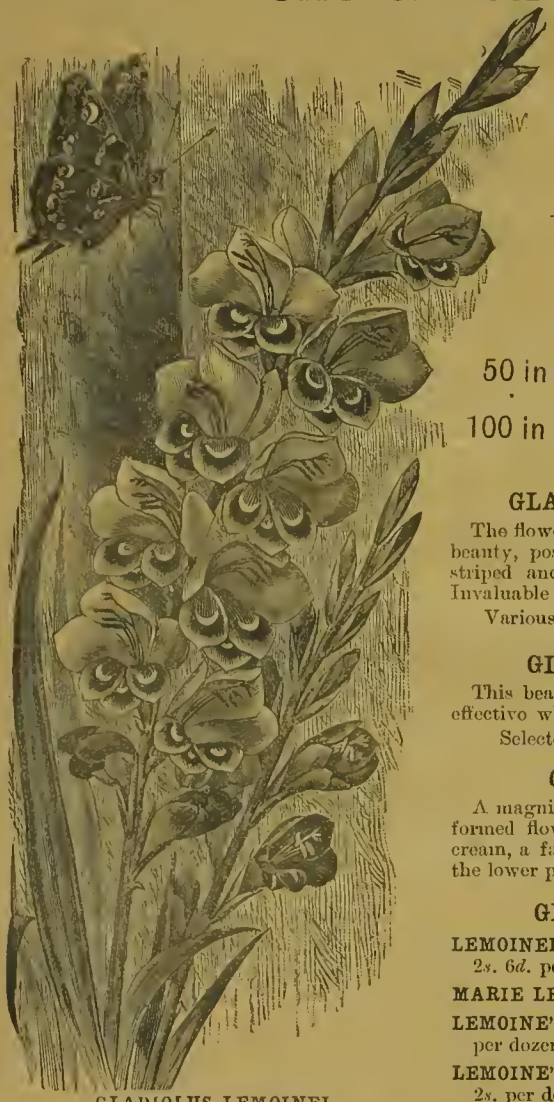
Soil is not much a point for consideration, so long as it is not stiff and consolidated ; but it is important that it should be deeply dug previous to planting.

Large bulbs should be planted from 3 to 4 inches, and smaller bulbs 2 inches deep.

During excessively dry weather, copious waterings are recommended.

When any bulbs show signs of growth before the time mentioned above, they should be potted and kept in a cool frame until the proper season for planting out.

CHOICE GLADIOLUS.



GLADIOLUS LEMOINEI.

AMARYLLIS BELLADONNA.

AMARYLLIS.

This deservedly popular family cannot be too highly recommended. The ease with which they are cultivated and the gorgeously beautiful flowers they produce at almost any season, make them most desirable in any collection. By gradually drying the bulbs they can be put to rest at any time during the year, and then, when required, if started in a gentle heat, they quickly develop their large Lily-like blossoms, which are of various colours, generally embracing crimson, white and red, scarlet, rose-flaked, striped white and crimson, with various shades of colours.

Choice selections of good sorts, 2, 3, 4 and 6 guineas per dozen.

AMARYLLIS BELLADONNA.

(The Belladonna Lily.)

These beautiful hardy bulbs have large handsome blush flowers, richly flushed with rosy purple, rendering them extremely useful for greenhouse and conservatory decoration. 6*s.* and 9*s.* per dozen; 40*s.* to 60*s.* per 100.

AMARYLLIS FORMOSISSIMA.

AMARYLLIS IGNESCENS.

This distinct and ornamental species is one of the most handsome of stove bulbs. It is very free-blooming, and bears on erect scapes umbels of fiery orange-scarlet flowers. 2*s.* 6*d.* and 3*s.* 6*d.* each. 18*s.* and 30*s.* per dozen.

AMARYLLIS PROCERA.

("Imperatrice de Brazil.")

A species with lilac-blue flowers. Very distinct and ornamental. Will succeed in a greenhouse. 15*s.* each.

AMARYLLIS FORMOSISSIMA.

A very handsome bulbous plant, freely producing magnificent flowers of a very rich dark velvety crimson. This distinct and attractive Amaryllis is very suitable for growing in pots, and is always interesting, owing to the rich colour and peculiar shape of its flowers. *Vide* illustration. It will succeed well in a warm greenhouse. 6*d.* each; 5*s.* 6*d.* per dozen.

CYCLAMEN AFRICANUM.

CYCLAMEN PERSICUM.

Too much can scarcely be said in favour of the superb varieties of this plant, of which the old *C. persicum* is the type, whether they are regarded as objects for the ornamentation of the greenhouse or conservatory, or for table decoration, for which their compact floriferous character eminently fits them. The flowers are also extremely useful for bouquets, and when plucked, if kept in water, they will last in freshness and beauty some weeks. 9*s.*, 12*s.* and 18*s.* per dozen. Flowering plants, 24*s.*, 30*s.* and 42*s.* per dozen.

CYCLAMEN AFRICANUM, a handsome, hardy species, with large ornamental leaves. Flowers bright reddish crimson. *Vide* illustration. 1*s.* each ; 10*s.* per dozen.

IRIS.

IRIS KÆMPFERI.

IRIS GERMANICA OR EVERGREEN.

The handsome hybrids of this beautiful section are of the greatest use for the adornment of beds and borders; the flowers are of rich and varied colours, and striped or blotched with purple and violet, on a white or yellow ground.

Choice mixed varieties, per 100, 13*s.* 6*d.*; per dozen, 2*s.* 6*d.*

Assortment of 50 in 50 choice varieties, 30*s.* and 42*s.*

Assortment of 25 in 25 choice varieties, 15*s.* and 21*s.*

Assortment of 12 in 12 choice varieties, 6*s.*, 9*s.* and 12*s.*

IRIS KÆMPFERI.

Many magnificent varieties of this handsome and attractive plant have been imported from Japan; indeed scarcely any plants in the flower garden can compare for gorgeous beauty with this section of Iris. Varying in colour from pure white to rich maroon-crimson, there are few flowers surpassing them in size and the brightness of their colouring. They succeed admirably planted on the margin of a lake or pond, or in any situation where plenty of moisture can be given. 2*s.* 6*d.* and 3*s.* 6*d.* each; choice varieties, 5*s.* and 7*s.* 6*d.* each. Mixed Seedlings, 7*s.* 6*d.* and 10*s.* 6*d.* per dozen.

SPIRÆA ASTILBOIDES.

SPIRÆAS.

SPIRÆA ASTILBOIDES.—One of the most handsome of hardy herbaceous perennials, which cannot be too highly appreciated as a decorative plant for early forcing. Certificated both by the Royal Horticultural and Royal Botanic Societies. The inflorescence consists of compound feathery branches of elegant white flowers. It is a charming and indispensable plant for pot culture, its beautiful flowers being produced in the greatest profusion. 9*d*., 1*s*., and 1*s*. 6*d*. each. 7*s*. 6*d*., 10*s*. and 15*s*. per dozen.

SPIRÆA ASTILBOIDES FLORIBUNDA. Produces thyrsoid spikes of bloom, much crowded with flowers. 2*s*. 6*d*. each.

SPIRÆA (HOTEIA) JAPONICA.—Most useful for decorative purposes. *Strong clumps*. 5*s*. per dozen.

SPIRÆA JAPONICA AUREO-RETICULATA.—Pretty variegated foliage, added to which it bears a profusion of handsome compact spikes of pure white flowers. 9*d*. each; 7*s*. 6*d*. per dozen.

SPIRÆA JAPONICA COMPACTA MULTIFLORA.—This most desirable variety is a great improvement on the old *S. japonica*, as it produces a profusion of large and dense spikes of pure white flowers, in telling contrast to the dark green foliage of the plant, the habit of which is dwarf and compact. 6*d*. each; 4*s*. 6*d*. per dozen.

SPIRÆA PALMATA.—The bright pink Spiræa, one of the most beautiful hardy plants in cultivation, producing lovely broad corymbs of pink flowers. It is a native of Japan. 6*d*. each; 4*s*. 6*d*. per dozen.

SPIRÆA PALMATA ALBA.—A counterpart of *S. palmata*, except in the colour of the flowers, which are pure white; a very beautiful and elegant variety. 9*d*. each; 6*s*. per dozen.

SINGLE-FLOWERED BEGONIA.

DOUBLE-FLOWERED BEGONIA.

BEGONIAS.

HANDSOME FLOWERED TUBEROUS-ROOTED SECTION.

The immense size to which the flowers of this popular race of plants have now attained considerably enhances their value for decorative and bedding purposes. Of nearly every shade of colour, from deepest crimson-scarlet to white, the blooms are produced in the utmost profusion, thus rendering them extremely showy and attractive.

SINGLE-FLOWERED.

Selections of good single-flowering named varieties can be made by Mr. W. B. at 12s., 18s. and 24s. per dozen.

Single-flowered unnamed Seedlings of various colours, 4s., 6s. and 9s. per dozen; 1½, 2 & 3 Guineas per 100.

DOUBLE-FLOWERED.

Named Varieties with double flowers, at 30s., 42s. and 60s. per dozen.

Double-flowered unnamed Seedlings of various colours, 6s., 9s. and 12s. per dozen. 35s., 50s. and 75s. per 100.

CHOICE GLOXINIAS.

The handsome and showy flowers of these beautiful bulbous plants render them of the greatest value for the decoration of stoves and conservatories. Of easy culture, they can, with judicious treatment, be had in bloom at almost any season of the year; their attractive flowers, being of large and good shape, are admirably adapted for cutting. The colours are most varied, every hue being pure and distinct, while some of the kinds are spotted and maculated in a most pleasing manner.

Choice selections made by Mr. W. B. at 18s., 24s. and 30s. per dozen according to sorts.

MIXED GLOXINIAS OF VARIOUS COLOURS.

Good blooming tubers, unnamed, of various colours, raised from handsome varieties, 6s., 9s. and 12s. per doz.; 40s., 50s. and 70s. per 100.

MIXED GLOXINIAS, SPOTTED AND MACULATED.

DOUBLE TUBEROSES

(POLIANTHES TUBEROSA.)

The perfectly double flowers of *Polianthes* are well known for their delicious fragrance and pearly whiteness, being admirably adapted for Button-holes, Bouquets, &c.; indeed, are of the greatest value wherever cut flowers are required. By successional plantings these lovely flowers may be had all through the summer and autumn. They should be potted in rich loamy soil and started in a good bottom heat, being afterwards grown on in a stove, with plenty of moisture.
